
Lead .NET Full Stack Engineer | Azure | React | Microservices

WORK EXPERIENCE

9+ years of experience in designing and developing enterprise applications using Microsoft .NET technologies.

Current Company: **Deloitte USI Consulting Pvt Ltd**

Designation: **Consultant**

Period: Feb 5th 2024- Present (2.3yrs)

Prev. Company3: Cognizant Technology Solutions

Designation: Senior Associate

Period: Oct 2023 – Jan 2024 (3 Months)

Prev. Company2: **Covalence Global Technologies Pvt Ltd., Hyderabad.**

Designation: **Senior Software Engineer**

Period: July 22nd, 2019- Oct 17th 2023(4.2yrs)

Prev. Company1: **Astoria Technologies Pvt Ltd., Hyderabad.**

Designation: **Software Engineer**

Period: Sep 6th, 2016 - July 15th, 2019 (2years 10 months)

PROFESSIONAL SUMMARY

- 9+ years of experience in designing, developing, and leading enterprise-scale web applications using .NET Core, ASP.NET MVC, React, Angular, and Azure cloud technologies.
- Strong expertise in cloud-native architecture, **Microservices**, REST APIs, and event-driven solutions using Azure Service Bus and Azure Functions.
- Experience **leading** technical discussions, mentoring developers, performing code reviews, and driving Agile delivery across cross-functional teams.
- Hands-on experience in application modernization and migration from legacy .NET Framework applications to .NET Core/.NET 8.
- Expertise in **Azure** App Services, Function Apps, Logic Apps, CI/CD pipelines, Application Insights, and secure cloud deployments.
- Implemented accessibility standards following **WCAG 2.1/2.2** compliance for enterprise applications.
- Experienced in performance optimization, resiliency patterns, authentication/authorization, and scalable distributed systems. Collaborative team

player with experience in **Agile/Scrum** environments, mentoring junior developers, and conducting code reviews.

- Exploring AI-assisted development tools including **GitHub Copilot** and **ChatGPT API** integration to improve engineering productivity and development efficiency.

TECHNICAL SUMMARY

- Strong experience implementing WCAG 2.1/2.2 accessibility standards and ADA compliance for enterprise-grade web applications.

Programming Languages:

C#, JavaScript, TypeScript

Frontend Technologies:

React, Angular (6-13), HTML5, CSS3, Bootstrap, AJAX, JavaScript, jQuery

Backend/.NET Technologies:

ASP.NET MVC 4/5/6, ASP.NET Core, .NET Core Web API, Entity Framework, LINQ, ADO.NET, RESTful APIs

Cloud Technologies:

Microsoft Azure (App Services, Azure Functions, Azure Service Bus, Logic Apps, Blob Storage, Application Insights)

Database Technologies:

SQL Server 2016/2019, MySQL, MongoDB

Architecture & Design:

microservices Architecture, N-Tier Architecture, Event-Driven Architecture, REST API Development

Authentication & Security:

OAuth 2.0, JWT Authentication, Role-Based Access Control (RBAC)

DevOps & Tools:

Azure DevOps, GitHub Actions, Docker, Git, TFS, SVN, Jira

Reporting & Monitoring:

Power BI, RDLC, Application Insights, Azure Monitor

IDE & Development Tools:

Visual Studio, Visual Studio Code

SENIOR SOFTWARE ENGINEER RESPONSIBILITIES

- Led end-to-end development and enhancement of enterprise web applications using ASP.NET Core, C#, React, Angular, and SQL Server.
- Participated in solution design discussions and contributed to scalable cloud-native application development using Microsoft Azure services.
- Developed RESTful APIs, reusable components, and microservices-based solutions following clean architecture principles.
- Implemented asynchronous processing and event-driven communication using Azure Service Bus and Azure Functions.

- Improved application performance through query optimization, caching strategies, lazy loading, and asynchronous programming techniques.
- Designed and implemented secure authentication and authorization mechanisms using OAuth 2.0, JWT, and role-based access control.
- Deployed and maintained applications in Azure App Services with CI/CD pipelines using Azure DevOps and GitHub Actions.
- Collaborated with Product Owners, QA teams, DevOps engineers, and stakeholders to deliver high-quality releases in Agile/Scrum environments.
- Mentored junior developers through code reviews, technical guidance, and best practice implementation.
- Worked closely with onsite teams and stakeholders for requirement analysis, technical discussions, and release planning.
- Worked on production support, monitoring, defect resolution, and root cause analysis for critical enterprise applications.

PROJECTS

Project: Michigan Unemployment Insurance (MIUI) USA

Type: Web-Based Application

Technologies: React, Asp.Net Core, SQL Server, Azure, AWS

Description:

Worked on a large-scale unemployment insurance application for the State of Michigan using React, ASP.NET Core, Azure, and SQL Server. Developed scalable and accessible web modules enabling claimants to file and track unemployment claims efficiently.

Responsibilities:

- Developed reusable React components and integrated secure REST APIs using .NET Core.
- Implemented WCAG 2.1 accessibility compliance to support ADA users.
- Collaborated with cross-functional Agile teams for feature delivery and production support.
- Improved application performance using lazy loading, code splitting, and optimized API responses.
- Participated in Azure cloud deployments and CI/CD pipeline activities.
- Contributed to debugging, issue resolution, and production monitoring activities.

Project 2: AstorSafe

Type: Web-Based Application

Technologies: ASP.NET Webforms 4.0/C#, Angular 6, SQL Server 2016)

Client: Singapore/India

Description: AstorSafe is a safety management application. It automates the safety of employees in Marine/Oil&Gas Industries by using RFID tags and devices to detect the employees' movements in/out based on that it calculates the employee attendance and productivity in the zones and generates the reports.

Responsibilities: Front End Designing and Coding using ASP.NET WebForms and writing queries, store-procedures, views & functions in SQL Server, and integrate Power-Bi reports.

Project: Pivedl

Technologies: ASP.NET MVC, Web API, Azure Cloud, MongoDB

Description: Worked on an eCommerce-based product management system supporting admins, distributors, vendors, and end-users. Implemented APIs, payment workflows, inventory management, and third-party integrations including Shopify and TaxJar.

ACHIEVEMENTS

- Received Applause Award at Deloitte for outstanding performance and delivery excellence.
- Awarded Best Employee Recognition at Astoria Technologies for exceptional contribution and commitment.

ACADEMICS

- BTech (Information Technology) from ALIET, Vijayawada affiliated with JNTUK (2008 -2012) passed with 63.1 %.
